

EROSION CONTROL & SEED ESTABLISHMENT

New Futerra® EnviroNet™

Utilizes advanced Futerra® technology, reinforced with a quick degrading, rectangular netting designed to minimize wildlife entanglement and improve site safety. EnviroNet is created for slopes and environmentally sensitive sites where windy conditions and/or higher levels of installation stress may be encountered. 99.9% effective; lighter weight for easier installation. New design minimizes risk to wildlife and equipment. EnviroNet has large aperture openings and degrades rapidly.

PennMulch

with Moisture Cell Technology
A pelletized paper mulch seed starter that supplies a moisture protecting environment to newly seeded areas. Easy to apply, PennMulch will not blow away and provides a finished professional appearance to your seeding jobs. It also contains a full rate of starter fertilizer which adds to its ability to speed up germination and development.

Rate: 50–80 lbs./1000 sq. ft.

- » 50 lb. bag

Salt Hay

The industry traditional and economical seed cover. Weed free and non-matting, salt hay protects grass seed through it's germination phase. It's fine texture makes for easy spreading. It allows excellent moisture penetration while minimizing the risk of erosion.

Rate: One bales covers ~900 sq. ft.

- » Bale

Hydro-Spray Mulch

National Fiber's Hydro-Spray mulch is formulated from recycled cellulose fiber. Hydro-Spray mulch creates a homogeneous slurry that readily blends with grass seed, fertilizer and other additives that will not clog hydraulic mulching equipment. It disperses easily and produces a semi-porous crust that promotes gradual, healthy absorption and retention of moisture.

Rate: 1000–1200 pounds (25–30 bales) of Hydro-Spray mulch provides optimum coverage for one acre.

- » 40 lb. bale

Hydro Tack Tackifier

A stabilizing and water retaining agent for aiding the spray application of cellulose and cellulose/wood blend mulches.

Rate: 3 pounds per acre along with cellulose mulch.

- » 5 x 3 lb.

Sod Staples - 6"

1000 steel "U" shape per box.

10-20-15 +2%FE Starter Fertilizer

20% SCU plus 2% Fe makes this an ideal starter fertilizer for commercial and residential applications (SGN 220). One bag covers 10,000 sq. ft. (~4.5 bags/acre). This rate provides 1.0 lb. P/1000 sq. ft.
